

Configuration, Test, Integrate

Global Convergence Inc. (GCI) offers Configuration to Order (CTO) – a product configuration program designed to deliver high-volume, custom product integration, configuration and final-build services to OEM manufacturers of technology products, Channel Partners, and also to Commercial End Users (CEU).

GCI typically manages the receipt, inventory, configuration, testing, product templating, software integration, and customized final build and assembly for either server-based or appliance-based technology products.

Units are configured and tested in one of several GCI CTO facilities capable of delivering high volume, customized product integration.

The CTO process can also be designed to support a Solution Selling model in the channel where GCI will build a system solution based on a customer design and product integration requirements.

Minimum volumes monthly are required to maintain the build and system proficiency.

Our Expertise

Global Convergence Inc. (GCI) is specialized in multi-vendor, multi-technologies and our CTO services can be supported in North America, Canada, Mexico, EMEA, and APAC.

GCI Configure-to Order Services

Standard Deliverable Components

Standard Deliverables

- Vendor products supported are custom-defined for each program
- Project-specific CTO programs
- Product build status reporting

Standard Deliverables

- Custom program design
- All build and test documentation
- Secure receipt, storage and inventory control for customer-owned assets
- Manufacture audit of quality and CTO process
- ISO 9001:2015
- ISO 27001:2013

Standard Deliverables

Receipt and storage of:

- Products
- Build
- Test
- Burn-in
- Template
- Configure
- Repackaging of final product
