

Implementation Services - Configuration to Order

Custom Designed Programs for Business

Whether you need final assembly and testing services, custom software and product integration or high-volume configuration services, Global Convergence Inc. (GCI) can custom design a program to fit your business needs.

Units are configured and tested in one of several GCI CTO facilities capable of delivering high volume, customized product integration.

GCI manages the receipt, inventory, configuration, testing, product templating, software integration, and customized final build and assembly for either server-based or appliance-based technology products.

The CTO process can also be designed to support a Solution Selling model in the channel where GCI will build a system solution based on a customer design and product integration requirements.

Minimum volumes monthly are required to maintain the build and system proficiency.

Our Expertise

Global Convergence Inc. (GCI) is specialized in multi-vendor, multi-technologies and our CTO services can be supported in North America, Canada, Mexico, EMEA, and APAC.

GCI Certifications

GCI has invested in universally accepted standards and has achieved certifications for ISO 9001:2015, ISO 27001:2013, SOC 1 Type 2 and SOC 2 Type 2. Additionally, GCI has certified for the EU-US Privacy Shield Framework program.

GCI has been named to the prestigious MSP 501 List at #59.

Configuration to Order

Standard Deliverables

- Vendor products supported are custom-defined for each program
- Server/Desktop/Laptop/ Notebook and other OEM Devices
- Network Data/Voice/ Security and Mobility Devices
- Project-specific CTO programs

Standard Deliverables

- Custom program design
- All build and test documentation
- Secure receipt, storage and inventory control for customer-owned assets
- Manufacture audit of quality and CTO process
- Product build status reporting

Standard Deliverables

- Secure Warehouse Storage on a Monthly Basis - Receipt and storage of:
- Products
 - Build
 - Test
 - Burn-in
 - Template
 - Configure
 - Repackage final product
