

GCINetwork Services – Third Party Hybrid Maintenance

Extend the Life of your Network & Reduce TCO

Need to maintain that legacy network a bit longer? Want to break away from those expensive lifecycle support contracts from multiple hardware manufacturers while extending the life of your network?

Global Convergence, Inc. (GCI) has a strong heritage of successfully supporting – and digitally transforming legacy, hybrid and end-of-service networks with our vendor-neutral and affordably priced GCINetwork (GCINet) Services.

Third Party Hybrid Maintenance Programs

GCINet Services third party hybrid maintenance (TPM) is a break/fix support program offering qualified techs and spares, worldwide, for variable service level agreements (SLAs) that are stringent to meet client needs.

A complete service solution delivering support when and where it's needed, GCINet customized programs can optimize service levels, along with variable pricing for customers. GCINet services help safeguard the critical components of the network infrastructure and the network applications.

GCINetwork Services Advantage

GCI blended services offer a significant savings opportunity versus traditional vendor network lifecycle serviceability costs.

Rest easy with worry-free global IT managed services from GCI. Managing and maintaining geographically dispersed Enterprise networks around the world is our area of expertise; this allows you to focus on what's most important – your customers.
